PROFESSIONAL SUMMARY

Senior iOS Developer with 8+ years shipping native and cross-platform mobile apps for international clients. Delivered 30+ apps through App Store review, including a food delivery platform that reached 5M+ downloads and an AI companion app rated 4.6 stars from 750+ ratings. Specializes in Swift, SwiftUI, UIKit, Objective-C, and ARKit, plus Flutter and Dart, REST and GraphQL APIs, and Fastlane CI/CD pipelines.

CORE SKILLS

Swift, SwiftUI, UIKit, Objective-C, Flutter, Dart, MVVM, Clean Architecture, Dependency Injection, REST APIs, GraphQL, URLSession, Alamofire, CoreData, SQLite, Keychain, ARKit, SceneKit, CoreML, Vision, MapKit, Firebase, Push Notifications, CocoaPods, Swift Package Manager, Git, App Store Connect, Swift Concurrency (async/await), Fastlane, CI/CD Pipelines, Performance Optimization & Profiling (Instruments), Unit Testing (XCTest), Code Review & Mentoring, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior iOS Developer — MindInventory Pvt. Ltd.

Jul 2018 – Present (serving notice until Oct 2026)

- Shipped 30+ iOS apps across gaming, food delivery, CRM, healthcare, and education for international clients, including consumer apps that reached 5M+ downloads.
- Delivered 2 production Flutter apps to iOS and Android from a single codebase, alongside native Swift and SwiftUI work.
- Integrated payment gateways, analytics, and third-party SDKs into end-to-end purchase and ordering flows across client apps.
- Automated builds, code signing, and TestFlight distribution with Fastlane CI/CD, keeping multi-client Agile/Scrum releases on schedule.
- Optimized memory usage and launch performance with Instruments, resolving retain cycles and main-thread stalls to improve app stability.
- Mentored junior iOS developers and led code reviews enforcing MVVM and Clean Architecture standards.

iOS Developer — Incipient Info

Feb 2018 – May 2018

- Developed the SteelBuddy B2B steel marketplace for iOS, building 4 core modules: quotations, inquiries, in-app chat, and push notifications.

Junior iOS Developer — Techrevere Solutions

Feb 2017 – Feb 2018

- Built and shipped iOS features for 2 production applications: The Morning Kitchen and CoalShastra.

SELECTED PROJECTS

Spark: AI Friends for Kids (AI Companion App)

- Developed iOS features and contributed 3D character model work to a kids' AI companion app with voice conversations and storytelling, rated 4.6 stars across 750+ App Store ratings.

Bhoj / Bhojdeals (Food & Grocery Delivery, Nepal)

- Built food delivery, restaurant discovery, and order management features for a platform that reached 5M+ App Store downloads and 1M+ Google Play installs.
- Engineered wallet, payment, maps, and push notification flows for an app that gained 2M+ users and holds a 4.0+ average rating (MindInventory case study).

CollabCRM (Flutter Cross-Platform Business OS)

- Delivered Flutter features for 6 business modules (CRM, project management, recruitment, invoicing, payroll, and people management) with reusable UI components and API integrations, coordinating with product, design, and backend teams.

Draw N Guess Multiplayer

- Created multiplayer game experiences for an app ecosystem that reached 5M+ installs across the App Store and Google Play.
- Implemented real-time drawing and guessing interactions for a game that earned 4.3 stars across 7K+ App Store ratings.

Additional App Store Titles

- Launched 7 apps across CRM, healthcare, education, and entertainment: CRM Sales Pipeline, Nutristar, Math Flash Cards, Virtual Piano+, Spin Wheel, 5 Second Rule, and Guess The Person.

OPEN SOURCE & AR PROJECTS

MIARKitExamples — ARKit face-tracking and virtual try-on samples (glasses, lenses, lipstick, moustache). | ARCarRims — ARKit visualization of 3D car rims in real-world space.

EDUCATION

Bachelor of Computer Applications (BCA), Saurashtra University
