Architecture & Quality: MVVM, Clean Architecture, Dependency Injection, Unit Testing (XCTest), Instruments, Performance Optimization, Code Review & Mentoring

AR, AI & Cross-Platform: ARKit, SceneKit, CoreML, Vision, Flutter, Dart

APIs & Services: REST APIs, GraphQL, URLSession, Alamofire, Firebase, Payment Gateways, Analytics SDKs

Delivery: Xcode, Fastlane, CI/CD Pipelines, TestFlight, App Store Connect, Git, CocoaPods, Swift Package Manager, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior iOS Developer | MindInventory Pvt. Ltd. | Jul 2018 - Present

- Shipped 30+ iOS apps for international clients across gaming, food delivery, CRM, healthcare, and education, including consumer apps that reached 5M+ downloads.
- Cut launch time by 35% and memory use by 25%, profiling with Instruments to fix retain cycles and main-thread stalls.
- Maintained 99%+ crash-free sessions on the apps I owned by triaging crash reports and shipping root-cause fixes.
- Led code reviews and mentored junior developers, reducing review turnaround by 40% on MVVM and Clean Architecture code.
- Delivered 2 production Flutter apps to iOS and Android from a single codebase, alongside native Swift and SwiftUI work.
- Integrated payment gateways, wallets, maps, analytics, and third-party SDKs into end-to-end purchase and ordering flows.
- Automated builds, signing, and TestFlight distribution with Fastlane CI/CD, keeping multi-client releases on schedule.

iOS Developer | Incipient Info | Feb 2018 - May 2018

- Developed the SteelBuddy B2B marketplace with 4 core modules: quotations, inquiries, in-app chat, and push notifications.

Junior iOS Developer | Techrevere Solutions | Feb 2017 - Feb 2018

- Built and shipped iOS features for 2 production apps: The Morning Kitchen and CoalShastra.

SELECTED PROJECTS

Bhoj / Bhojdeals | Food & Grocery Delivery, Nepal

- Built food delivery, restaurant discovery, and order management features that handle thousands of daily orders for a platform with 5M+ downloads on the App Store.
- Engineered wallet, payment, maps, and push notification flows for an app that reached 2M+ users, 1M+ installs on Google Play, and a 4.0+ average rating (MindInventory case study).

Draw N Guess Multiplayer | Real-Time Multiplayer Game

- Created multiplayer game experiences for an app ecosystem that reached 5M+ installs across the App Store and Google Play.
- Implemented real-time drawing and guessing interactions for a game averaging 4.3 from 7K+ ratings on the App Store.

Spark: AI Friends for Kids | AI Companion App

- Developed iOS features and contributed 3D character model work to a voice-driven AI companion app averaging 4.6 from 750+ ratings on the App Store.

CollabCRM | Flutter Business Operating System

- Delivered Flutter features for 6 business modules: CRM, projects, recruitment, invoicing, payroll, and people management.

More apps: CRM Sales Pipeline, Nutristar, Math Flash Cards, Virtual Piano+, Spin Wheel, 5 Second Rule, Guess The Person

Open source (ARKit): MIARKitExamples - face tracking and virtual try-on | ARCarRims - 3D car rims in real-world space

EDUCATION

Bachelor of Computer Applications (BCA) | Saurashtra University
